Revenue vs Quantity

Insights

- United Kingdom generated over £8.2M in revenue, far exceeding every other country.
- Dotcom Postage was the highest revenue-generating product.
- Revenue peaked during November and December, indicating strong holiday demand.
- A small number of customers contributed a disproportionately large share of revenue.
- Several products sold in high volumes but generated low revenue because of lower unit prices.

Recommendations

- Focus marketing campaigns on the highest-revenue products.
- Prioritize customer retention for high-value customers.
- Increase inventory before peak sales months.
- Expand sales strategy in countries with strong revenue potential.
- Bundle low-price, high-volume products to increase average order value.
